

Permit Pro

Permit Management

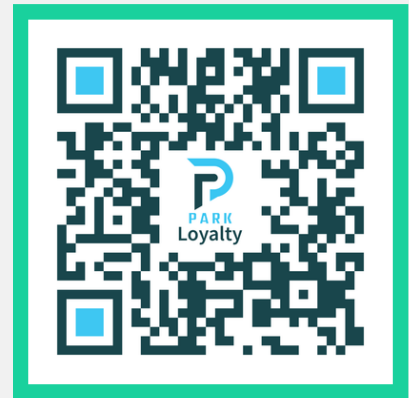

Hang up the hangtag.

Permit Pro simplifies permitting with a fully digital, license-plate-based system that's easy to manage and enforce. No paper forms, no hangtags, no inventory to manage. Reduce walk-ins, prevent fraud, and boost enforcement accuracy. Officers just scan plates as part of their workflow with no extra steps. Admins spend less time on manual tasks and more time making data-supported decisions based on real-time and historic insights.

Flexible rules and permit types allow agencies to tailor programs to their policies and evolving needs, from simple permits to complex setups. Real-time synchronization with enforcement systems ensures permit status is always current and can be validated by officers on their route.

For motorists, it's fast and easy. They can apply, pay and have their permit active right away through the Motorist Portal, with real-time confirmation that it's valid when they park.

No printing, no waiting on the mail. Active as soon as approved, verifiable by enforcement. Fewer errors, fewer complaints, happier customers.

Self-Service Convenience

Customers can apply, pay, and get real-time updates online.

Automated Renewals

Automated permit renewals for recurring programs.

Seamless Integration

Permits are verifiable by enforcement and other parking systems in real time.

Flexible Permit Management

Customizable rules for any permit type (residential, visitor, business, etc.).

Reports & Waitlist Control

Insightful reports, live trend analysis and waitlist control.
