

# Automated Enforcement

**The freedom to choose: any LPR camera, any setup. The enforcement engine that adapts to you.**

A flexible solution for off-street operations, the Automated Enforcement Module by Park Loyalty is a smart aggregator, pulling plate data from any fixed or mobile LPR system and checking it against permits, payments, and reservations. Potential violations generate a clear, time-stamped evidence package for automated enforcement that's fast, accurate, and defensible.

Automation doesn't replace oversight. If desired, cases can enter a staff review queue before the processing workflow kicks off, ensuring your program rules guide enforcement decisions.

## LPR Agnostic

Compatible with any fixed or mobile LPR camera hardware.

## Automated Workflows

Supports ticket-by-mail, windshield delivery, or manual citations.

## Seamless Integration

Connection to LPR, permit, payment and reservation systems.

## Complete Evidence Package

Includes staff-controlled violation review queue.

## Omnichannel Enforcement

Built for municipalities, universities, private operators, and beyond.
